

# Year 10 Food Technology 2026 teacher program

Four term focus areas for 10FOTE1. This school-developed program maps the current course website and the 2019 NSW Food Technology syllabus. It is a review draft until the school timetable, practical program and assessment schedule are confirmed.

| Delivery                                            | Syllabus                                                          | Website state                                                | Approval                            |
|-----------------------------------------------------|-------------------------------------------------------------------|--------------------------------------------------------------|-------------------------------------|
| Four 2026 terms; hours and class periods to confirm | 2019 current basis; 2025 starts 2028 unless early use is approved | Published guided course; Classroom is the live course record | Teacher review and sign-off pending |

## Official Stage 5 outcomes

Exact NESA wording is shown below. The website supports the identified theory and planning outcomes. Practical performance outcomes require the teacher's approved local sequence and evidence before they can be signed off.

| Code          | Exact wording                                                                                     | Code          | Exact wording                                                                                                                     |
|---------------|---------------------------------------------------------------------------------------------------|---------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>FT5-1</b>  | demonstrates hygienic handling of food to ensure a safe and appealing product                     | <b>FT5-2</b>  | identifies, assesses and manages the risks of injury and WHS issues associated with the handling of food                          |
| <b>FT5-3</b>  | describes the physical and chemical properties of a variety of foods                              | <b>FT5-4</b>  | accounts for changes to the properties of food which occur during food processing, preparation and storage                        |
| <b>FT5-5</b>  | applies appropriate methods of food processing, preparation and storage                           | <b>FT5-6</b>  | describes the relationship between food consumption, the nutritional value of foods and the health of individuals and communities |
| <b>FT5-7</b>  | justifies food choices by analysing the factors that influence eating habits                      | <b>FT5-8</b>  | collects, evaluates and applies information from a variety of sources                                                             |
| <b>FT5-9</b>  | communicates ideas and information using a range of media and appropriate terminology             | <b>FT5-10</b> | selects and employs appropriate techniques and equipment for a variety of food-specific purposes                                  |
| <b>FT5-11</b> | plans, prepares, presents and evaluates food solutions for specific purposes                      | <b>FT5-12</b> | examines the relationship between food, technology and society                                                                    |
| <b>FT5-13</b> | evaluates the impact of activities related to food on the individual, society and the environment |               |                                                                                                                                   |

## Teacher to confirm before delivery

Actual 100- or 200-hour course basis, periods and practical majority; approved recipes, equipment and risk controls; formal notices beyond the posted Food Trends task; the draft exam's issue status; any documented 2025 early adoption. The four practical rows below reserve decisions, not authorised class activities.

Sequence note: P numbers are 20 planning slots across four term blocks. They are not an approved period allocation. Replace them with dated school lessons after the timetable is confirmed.

Content focus cells below are school-developed summaries for planning. The Stage 5 outcome statements above preserve the official wording.

Program sign-off: Course teacher \_\_\_\_\_ Head Teacher \_\_\_\_\_ Date \_\_\_\_\_

## Term 1 Food Equity

Teach the three named website sections in order; use the matching slides, visual and inline practice before each closed check. Students save formative work on their own device. Classroom holds the current practical and formal assessment directions.

| P | Type                          | Focus                                                             | Teaching and learning                                                                                                                                                                      | Syllabus content                                                                                | Evidence / outcomes                                                                                                                                     |
|---|-------------------------------|-------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <a href="#">Site/theory</a>   | <a href="#">What food equity means</a>                            | Compare food availability with real access using two households and a stocked shop. Read, sort availability/access evidence, then explain a barrier without blaming people.                | Food equity: investigate access to suitable food and factors shaping food choices.              | The <a href="#">10-question check</a> and one written access comparison saved locally. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13                       |
| 2 | <a href="#">Site/theory</a>   | <a href="#">Barriers to food and water</a>                        | Trace food and safe-water supply barriers; weigh what desalination can and cannot address. Use the systems visual to mark an interruption and test response trade-offs.                    | Food equity: examine barriers to food and water supply and possible responses.                  | The <a href="#">10-question check</a> and one comparison of responses saved locally. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13                         |
| 3 | <a href="#">Site/theory</a>   | <a href="#">Investigate and respond</a>                           | Test a food-access claim against dated, local evidence and design a targeted response. Separate observation from inference; write a claim-evidence-limitation conclusion.                  | Food equity: investigate food inequity using evidence and evaluate strategies for change.       | The <a href="#">10-question check</a> and one evaluated access plan saved locally. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13                           |
| 4 | <a href="#">Project/folio</a> | <a href="#">Apply and select evidence - Food Equity</a>           | Use the <a href="#">Module 1 applied scenario</a> and <a href="#">puzzle bank</a> . <a href="#">Review all three checks</a> ; select one meaningful <a href="#">folio record</a> .         | Food equity: apply and communicate a reasoned food decision using relevant evidence.            | Formative activity choice/justification and one selected folio card; formal submission remains in Classroom. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13 |
| 5 | <a href="#">Practical</a>     | <a href="#">Teacher-approved practical sequence - Food Equity</a> | Reserved planning slot only. Enter the approved recipe/brief, equipment, supervision, risk controls, preparation and clean-down before use. Allocate actual time from the local timetable. | Food equity: practical food design, preparation and evaluation under current school procedures. | Teacher-controlled practical observations and product evidence - <a href="#">Teacher to confirm</a> .                                                   |

### Checks and adjustments

Check each section's 10 feedback-bearing questions and one scaffolded written response, then use the visible three-link module review. Offer vocabulary and read-aloud support, a paired explanation before writing and an accessible non-video pathway. Use the applied scenario and one selected folio card for a concise evidence sample.

**Teacher to confirm before use** Allocate actual periods and a practical majority; insert approved food preparation, supervision and risk controls. Confirm any assessed task notice in Classroom.

## Term 2 Food Trends

Teach the three named website sections in order; use the matching slides, visual and inline practice before each closed check. Students save formative work on their own device. Classroom holds the current practical and formal assessment directions.

| P  | Type                          | Focus                                                             | Teaching and learning                                                                                                                                                                                                                                                     | Syllabus content                                                                                     | Evidence / outcomes                                                                                                                                     |
|----|-------------------------------|-------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6  | <a href="#">Site/theory</a>   | <a href="#">Why food trends emerge</a>                            | Identify drivers of a food trend and distinguish popularity from evidence of benefit. Sort fictional trend headlines into description, claim and evidence.                                                                                                                | Food trends: examine current trends and factors influencing their appeal.                            | The <a href="#">10-question check</a> and one evaluation of two trend claims saved locally. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13                  |
| 7  | <a href="#">Site/theory</a>   | <a href="#">Local produce, waste and value adding</a>             | Compare local produce, food miles, waste and value adding across a food journey. Trace two produce journeys and record missing impact information.                                                                                                                        | Food trends: discuss local produce, food miles, food waste, value-added products and sustainability. | The <a href="#">10-question check</a> and one surplus-produce decision saved locally. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13                        |
| 8  | <a href="#">Site/theory</a>   | <a href="#">Evaluate a food trend</a>                             | Read a label fairly and evaluate a trend claim for a named consumer. Compare fictional labels per 100 g and name an unanswered question.                                                                                                                                  | Food trends: investigate consumer appeal and test nutrition and environmental claims.                | The <a href="#">10-question check</a> and one conditional trend recommendation saved locally. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13                |
| 9  | <a href="#">Project/folio</a> | <a href="#">Apply and select evidence - Food Trends</a>           | Use the <a href="#">Module 2 applied scenario</a> and <a href="#">puzzle bank</a> . <a href="#">Review all three checks</a> ; select one meaningful <a href="#">folio record</a> . Open the <a href="#">posted Food Trends task</a> in Classroom for formal instructions. | Food trends: apply and communicate a reasoned food decision using relevant evidence.                 | Formative activity choice/justification and one selected folio card; formal submission remains in Classroom. FT5-6, FT5-7, FT5-8, FT5-9, FT5-12, FT5-13 |
| 10 | <a href="#">Practical</a>     | <a href="#">Teacher-approved practical sequence - Food Trends</a> | Reserved planning slot only. Enter the approved recipe/brief, equipment, supervision, risk controls, preparation and clean-down before use. Allocate actual time from the local timetable.                                                                                | Food trends: practical food design, preparation and evaluation under current school procedures.      | Teacher-controlled practical observations and product evidence - <a href="#">Teacher to confirm</a> .                                                   |

### Checks and adjustments

Check each section's 10 feedback-bearing questions and one scaffolded written response, then use the visible three-link module review. Offer vocabulary and read-aloud support, a paired explanation before writing and an accessible non-video pathway. Use the applied scenario and one selected folio card for a concise evidence sample.

**Teacher to confirm before use** Allocate actual periods and a practical majority; insert approved food preparation, supervision and risk controls. Confirm any assessed task notice in Classroom.

## Term 3 Food for Special Occasions

Teach the three named website sections in order; use the matching slides, visual and inline practice before each closed check. Students save formative work on their own device. Classroom holds the current practical and formal assessment directions.

| P  | Type                          | Focus                                                                            | Teaching and learning                                                                                                                                                                      | Syllabus content                                                                                               | Evidence / outcomes                                                                                                                              |
|----|-------------------------------|----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| 11 | <a href="#">Site/theory</a>   | <a href="#">Food, identity and significance</a>                                  | Explain food significance using people, occasion and trustworthy perspectives. Compare fictional occasion accounts; avoid treating one family as a whole culture.                          | Food for special occasions: explore food's social, cultural and personal significance.                         | The <a href="#">10-question check</a> and one inclusive occasion explanation saved locally. FT5-7, FT5-8, FT5-9, FT5-11, FT5-12                  |
| 12 | <a href="#">Site/theory</a>   | <a href="#">Celebrations across time and place</a>                               | Compare celebration foods across time and place without assuming one fixed tradition. Mark observation, inference and missing perspective in a dated-menu example.                         | Food for special occasions: investigate celebration traditions, change and global influences.                  | The <a href="#">10-question check</a> and one source-aware historical comparison saved locally. FT5-7, FT5-8, FT5-9, FT5-11, FT5-12              |
| 13 | <a href="#">Site/theory</a>   | <a href="#">Plan for an occasion</a>                                             | Justify a hypothetical occasion menu against guest needs, meaning and resources. Compare two hypothetical menu proposals against a brief and one trade-off.                                | Food for special occasions: plan suitable food choices for a specified occasion.                               | The <a href="#">10-question check</a> and one justified menu approach saved locally. FT5-7, FT5-8, FT5-9, FT5-11, FT5-12                         |
| 14 | <a href="#">Project/folio</a> | <a href="#">Apply and select evidence - Food for Special Occasions</a>           | Use the <a href="#">Module 3 applied scenario</a> and <a href="#">puzzle bank</a> . <a href="#">Review all three checks</a> ; select one meaningful <a href="#">folio record</a> .         | Food for special occasions: apply and communicate a reasoned food decision using relevant evidence.            | Formative activity choice/justification and one selected folio card; formal submission remains in Classroom. FT5-7, FT5-8, FT5-9, FT5-11, FT5-12 |
| 15 | <a href="#">Practical</a>     | <a href="#">Teacher-approved practical sequence - Food for Special Occasions</a> | Reserved planning slot only. Enter the approved recipe/brief, equipment, supervision, risk controls, preparation and clean-down before use. Allocate actual time from the local timetable. | Food for special occasions: practical food design, preparation and evaluation under current school procedures. | Teacher-controlled practical observations and product evidence - <a href="#">Teacher to confirm</a> .                                            |

### Checks and adjustments

Check each section's 10 feedback-bearing questions and one scaffolded written response, then use the visible three-link module review. Offer vocabulary and read-aloud support, a paired explanation before writing and an accessible non-video pathway. Use the applied scenario and one selected folio card for a concise evidence sample.

**Teacher to confirm before use** Allocate actual periods and a practical majority; insert approved food preparation, supervision and risk controls. Confirm any assessed task notice in Classroom.

## Term 4 Food Service and Catering

Teach the three named website sections in order; use the matching slides, visual and inline practice before each closed check. Students save formative work on their own device. Classroom holds the current practical and formal assessment directions.

| P  | Type                          | Focus                                                                           | Teaching and learning                                                                                                                                                                      | Syllabus content                                                                                              | Evidence / outcomes                                                                                                                                      |
|----|-------------------------------|---------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 16 | <a href="#">Site/theory</a>   | <a href="#">Service settings and customers</a>                                  | Compare canteen, café, food truck and event-catering service models. Map an allergen-information question through front and back of house.                                                 | Food service and catering: examine ventures, customers, operations and staff roles.                           | The <a href="#">10-question check</a> and one service-setting comparison saved locally. | 20 | <a href="#">Practical</a>     | <a href="#">Teacher-approved practical sequence - Food Service and Catering</a> | Reserved planning slot only. Enter the approved recipe/brief, equipment, supervision, risk controls, preparation and clean-down before use. Allocate actual time from the local timetable. | Food service and catering: practical food design, preparation and evaluation under current school procedures. | Teacher-controlled practical observations and product evidence - <a href="#">Teacher to confirm</a> .                                                    |

### Checks and adjustments

Check each section's 10 feedback-bearing questions and one scaffolded written response, then use the visible three-link module review. Offer vocabulary and read-aloud support, a paired explanation before writing and an accessible non-video pathway. Use the applied scenario and one selected folio card for a concise evidence sample.

**Teacher to confirm before use** Allocate actual periods and a practical majority; insert approved food preparation, supervision and risk controls. Confirm any assessed task notice in Classroom.
